

Product Specification

- Pole made of Galvanised Steel
- High strength and corrosion resistance in various atmospheric conditions
- All the joints in the body of the pole are welded by using v groove technique
- Pole used for integration of various LED modules

Product Description

- Coating process makes the pole excellent corrosion resistant.
- Quick installation and low assembly costs.
- Functionally versatile, strong and stable.
- Long life span with very low maintenance.

Area of Application

Street Lighting, Smaller Roadways, Private driveways, Residential Area Lighting,
Courtyards, Public parks & Squares.
